

CE-IT Community

A Clinical Engineering/IT Collaboration

What is the CE-IT Community Working On? *May 29, 2009*

SPONSORED BY

[Working Group 1 - Infrastructure-Wireless](#) nothing to report yet, but stay tuned!

[Working Group 2 - Medical Device Integration](#) has completed a draft reference document outlining the existing standards and other resources related to medical device integration. Next steps include the incorporation of suggestions and distribute document to full CE-IT Community for review. Additionally this group is nearing completion of a draft list of questions facilities should ask vendors with respect to medical device integration. The document is set up in a "decision tree" format, allowing users to follow a path of questions based on the type of equipment in question. Categories of questions include: security, hardware, software, and more.

[Working Group 3 - Emerging Technologies](#) has revised its draft white paper on "first call" responsibilities for healthcare networking issues, based on comments received from the CE-IT Community. Next step: draft will be given a final review by the CE-IT Community's Steering Committee before being published.

[Working Group 4 - CE-IT Collaboration](#) has begun reviewing existing educational materials (CDs, books, etc.) to determine what basic information biomed/clinical engineers need to know about IT, and what basic information IT professionals need to know about biomed/clinical engineering.

[Working Group 5 - Risk Management](#) nothing to report yet, but stay tuned!

How can you join?

- ❖ [Attend an upcoming event](#)
- ❖ Join one of the workgroups by clicking on the email hyperlinks listed above
- ❖ Bookmark the [CE-IT Community website](#) and stay tuned for regular updates
