

CE-IT Community

A Clinical Engineering/IT Collaboration

CALL FOR PARTICIPATION: Workgroup #1 Infrastructure Wireless

SPONSORED BY

A call for participation is being issued to reenergize the workgroup using all media available to the community including website, cosponsoring organizations membership and distribution to the listserv. The new workgroup will engage in current activities and collaborations i.e. the Wireless Healthcare Forum as collaborative partners of the CE-IT Community. Proposed first meeting date the week of September 15, 2009. **Get Involved:** contact LaVerne Palmer at lpalmer@himss.org today!

Potential Deliverables:

- 1) Develop a framework to define the technical specs for a medical grade network, including wireless.
- 2) Develop a whitepaper comparing the benefits and risks of wireless medical devices.
- 3) Develop a whitepaper comparing the benefits and risks of putting wireless devices on an isolated infrastructure vs. a shared enterprise infrastructure.

About the Community: The CE-IT Community provides an effective point of connection between IT and biomedical/clinical engineering individuals and groups, and the broader healthcare community. The community is open to all individuals including, but not limited to biomedical equipment technicians, clinical engineers, clinical engineering technology managers, IT professionals, device designers, device manufacturers, clinicians, and those interested in the broader field of clinical engineering-IT convergence.
